WAR RATION BOOK 2 WILL BE ISSUED SOON

You will soon receive your War Ration Book No. 2, which will be used to secure articles under a new "point-value" system.

This is a plan for rationing articles by groups. One group might include meats, cheese and eggs. Some items will have higher point-value than others. For example: it will take more points to buy hamburger steak than it will to buy a soup bone. Also, according to this plan of rationing, it will take fewer points to buy articles that are plentiful than to buy those that are scarce. For example: if eggs are plentiful and meat is scarce, it will take fewer "points" to buy eggs.

You may spend your point-stamps as you wish to buy any of the rationed articles, but when your points are used, you will not be able to buy any more of these rationed items until the next ration period.

Any person entering military service should turn in his War Ration Book No. 1 to his local War Price and Rationing Board. No other person is entitled to use this book.

SERVICE FOLKS RECEIVE GIFTS FROM HOME TOWN

The holiday packages sent out to those in the service from this locality a few weeks ago reached their destinations in the United States before Christmas and were much appreciated. We print a few of the notes of thanks received, which will well repay the local people who contributed and worked for the project.

To the Bethel Home Folks:

I want to express my sincere appreciation to those of you who so generously contributed toward my holiday box.

It means a lot to a person, so far from home and familiar surroundings to receive a package like this. It brings back memories of home especially at this time of year. Thanking you again.

Sincerely
A/C HOWARD F. THURSTON

Dear Folks,

I received the cigarettes and want to thank you for them. Would like to wish you all a happy and prosperous New Year.

Hello Everyone,

I received your package today in perfect condition and sure did appreciate it. It really does seem good to get something from home. With the support from home we will win this war with "flying colors." I wish to thank you and all the folks from the town of Bethel for the box, and the way you always stand behind us.

SHIRLEY GILBERT

I wish to thank the "Bethel Home Folks" for the Christmas package, also all my friends and relatives for the many cards, gifts and remembrances at Christmas time.

TROOP UNIT IDENTIFICATION SHOULD NOT BE REVEALED

The wholesale publication by newspapers of the addresses of men serving in the Navy or overseas is the subject of a statement released by the Office of Censorship. Although the Citizen has at all times conformed to their request, several dailies and weeklies in the state have ignored it. The Office of Censorship said:

On battlefronts every day men risk their lives to discover the location and strength of the military units of the enemy. Yet at home, too many of us are presenting the enemy with information of the same military value.

This is the information which newspapers and individuals are asked not to tell the enemy:

DO NOT TELL the names of ships upon which sailors serve.

DO NOT TELL the troop units in which soldiers serve overseas.

There is no objection in revealing that Pvt. John Jones is in Australia or that Seaman Tom Brown saw action in the Atlantic, but there is military information which endangers the lives of American fighting men in stating that Pvt. John Jones, "Company C, 600th Infantry," is in Australia, or Seaman Tom Brown Aboard the U.S.S. Wisconsin," is in the Atlantic.

The Office of Censorship says: "We ask editors not to publish these troop identifications, and we ask parents and relatives not to reveal them. Don't give the enemy anything that may lengthen the war!"

AXIS COLLAPSE NOT LIKELY THIS YEAR; U. S. PRODUCTION GAINS

New Year's Day 1943 marked the first anniversary of the formation of the United Nations. In his first press conference of the new year, President Roosevelt recalled the world situation that existed one year ago when 26 nations, bound together by the universal ideals of the Atlantic Charter, signed the United Nations declaration and thus created "the mightiest coalition in history." (Three other nations have since joined this coalition.)

Today the unity achieved by these 29 signatory powers is bearing rich fruit. The United Nations, said the President, are passing from the defensive to the offensive, ever conscious, however, of the supreme necessity of planning what is to come after, of carrying forward into peace the common effort which will have brought them victory in the war.

Our task on this New Year's Day is three-fold, Mr. Roosevelt said: first, to crush completely the present "bandit assault" upon civilization; second, so to organize relations among nations that forces of barbarism can never again break loose; and third, to cooperate to the end "that mankind may enjoy in peace and in freedom the unprecedented blessing which Divine Providence through the progress

What You Buy With WAR BONDS

Navy Cruisers are built in two classes, light and heavy, the latter displacing about 10,000 tons. Our navy has about an equal number of light and heavy Cruisers, the 10,000 ton Cruiser costing approximately \$20,000,000. Many Cruisers are under construction and many more are needed.

To pay for these speedy and powerful ships with their heavy guns and armament we must buy War Bonds. Citizens of a large town or a given community, working in unity, could buy one of these ships for the Navy if they put at least ten percent of their income in War Bonds every pay day.

Wishful thinking will not halt Hitler's tyranny, nor will "spare-change" financing give us the money necessary to win this war. So start today investing in your country's War Bonds with ten percent or more of your earnings.

Wishful thinking will not help you to buy that new furniture when the war is won. But your money saved in War Bonds will. Join the Payroll Savings Plan at your office or factory. Let's "Top that Ten Percent."

GOULD QUINTET TRAVELS TO OXFORD FRIDAY

With practice started only last Tuesday, the Gould Academy Court Cluster has very short time to prepare for their first 1943 tussle to be held at Oxford High on Friday, Jan. 9. Prospects were given a rude shock when it was known that the veteran guard, Wilfred Coolidge, would not return to school. Also, many of the boys returned with bad colds and in poor condition. Coach Anderson feels rather dubious concerning Friday's encounter.

The boys who will carry the greater burden of the work will be Townsend, Emery, Torrey, Berry, Wright and Rosenberg.

Next week Gould will entertain South Paris High at Bethel in the first home League game. Oxford is also a League opponent.

of civilization has put within our reach."

Axis economic strength and weakness was outlined in a "beginning of 1943" balance sheet issued by Milo Perkins, Executive Director of the Board of Economic Warfare. Germany, said Mr. Perkins, has passed her production peak but is still economically formidable, and there is little likelihood of economic collapse in Germany in 1943. Japan, however, is much stronger in raw materials than she was a year ago, and except for a major weakness in shipping she is now within reach of a powerful and entrenched economic position. The ability of the Axis powers to support defensive warfare is especially marked, he said, but as both economies are strained, conflicting bomb damage on Germany and attacking Japanese shipping will have immediate effects on these countries' war production.

Production

As for U. S. war production, Chairman Nelson said that in 1943 this country expects to produce about twice as many arms as were produced in 1942, spending better than \$90,000,000,000 for war, as compared to 1942's \$52,000,000,000. November armament production showed the greatest monthly gain since the U. S. began to rearm in the summer of 1940—four and one-third times more war material turned out than in the month before the Jap attack on Pearl Harbor. Mr. Nelson gave the box score of November war production (over October): airplanes, up 18 percent; ordnance, up 13 percent; Army and Navy vessels, up 5 percent; merchant vessels, up 26 percent; and other munitions, up 3 percent.

Special attention has been given to the items most needed in the type of warfare now being waged in North Africa, with outstanding gains recorded in the output of single-engine pursuit planes, medium bombers, smaller transport planes, and Navy fighters, and also in the production of the self-propelled guns used in tank warfare.

Right now the U. S. is turning out enough rifle and machine gun ammunition each month to fire 83 rounds at each individual soldier in the Axis armies. In one year of war, production of small arms ammunition has increased 550 percent—and it is still going up.

Rationing

Agriculture Secretary Wickard directed the OPA to begin rationing about 200 canned, frozen and dried vegetables and fruits as soon as machinery could be set up. U. S. civilians will eat nearly one-third less of these foods in 1943 than they have been accustomed to eating, Mr. Wickard said, but their diets can still be well-balanced and healthful. Rationing in the U. S. does not mean sub-standard diets.

BROOKS CHOSEN HEAD CHAMBER COMMERCE

The regular meeting of the Bethel Chamber of Commerce was held at the Legion Rooms Tuesday evening following an oyster stew supper served by Norman Hall, George Thompson and Grover Brooks. Officers for 1943 were chosen as follows:

President—Gerry Brooks
Vice-President — William C. Chapman

Secretary—Gerard Williams
Treasurer—Elmer Bennett

Standing committees for the year were appointed by the president: Membership—William C. Chapman, H. I. Bean, Harold Chamberlin

Program—Gerard Williams, Carl Brown, Philip Burns, Eugene Van Den Kerckhoven, E. Linwood Brown

Finance—Elmer Bennett, Fred Edwards, D. Grover Brooks

E. Linwood Brown, F. Perley Flint and Philip R. Burns will serve as supper committee for the February meeting and tickets will be sold by Norman Hall, Harold Chamberlin and William Chapman.

It was voted that the Bethel signs, put up by the Chamber several years ago, be taken down for a time and be refinished before being used again. Robert Blake was appointed to see that they were taken down and stored.

Although no program was planned, President Brooks called upon Secretary Williams who spoke briefly on the town's winter sports possibilities. It is his opinion that Bethel's location, scenery and slopes compare most favorably with those of communities which have attracted many winter sports enthusiasts in normal times. Later at the request of the president, Fred Edwards told of the sale of graybirch for manufacture in war uses, followed by a short discussion of lumber manufacture and sources of supply.

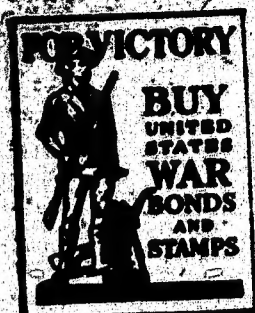

OPA said the rationing would begin in early February, under the "point" system. Supplies of goods to be rationed will be temporarily and briefly frozen on retailers' shelves and in distributors' and processors' houses, and before being issued a ration book consumers will have to declare whatever canned goods they have on hand so that these goods can be deducted from their allowances. Heavy penalties will be imposed for giving false information.

The War Front

From the beginning of the North Africa operations to Dec. 26, 277 enemy airplanes have been destroyed. Of these, 128 were brought down by the RAF, 102 by the U. S. Army Air Forces and 16 by anti-aircraft fire. Allied losses for the same period total 114—59 from the USAAF and 55 from the RAF.

Allied air activity in North Africa has taken five forms: short range fighters and fighter bombers (mainly provided by the RAF) do the battle area attacking; bombers (mainly provided by the USAAF) carry out the daylight attacks on ports shipping, airbases and railroads; RAF bombers handle the heavy night attacks, concentrating on Tunis and Bizerte; RAF reconnaissance planes protect convoys and attack i-boats; and USAAF transport planes bring men and supplies into the forward areas.

In the Southwest Pacific area in 1942 1,285 Japanese planes were destroyed or damaged, according to an Allied Air Forces announcement. This total includes 723 planes destroyed 250 probably destroyed and 312 damaged. In comparison, the announcement said, Allied plane losses were small.

WAR RATION BOOKS WILL BE ISSUED

You will soon receive Ration Book No. 2, which will be used to secure articles on a "point-value" system.

This is a plan for rationing articles by groups. One group includes meats, cheeses, and some items will have more value than others. For example, a pound of beef will take more points than a pound of hamburger steak than it would a soup bone. Also, according to the plan of rationing, it will take fewer points to buy articles that are plentiful than to buy articles that are scarce. For example, eggs are plentiful and meat is scarce, so it will take fewer "points" to buy eggs.

You may spend your points as you wish. When you use your points to buy an article, your points are used, and you will be able to buy any other rationed item until the next rationing period.

Any person entering military service should turn in his Ration Book No. 1 to his local War Relocation Authority and Rationing Board. This person is entitled to a new Ration Book No. 2.

SCHOOL DAYS

By DWIG

NATIONAL PRESS BUILDING WASHINGTON, D. C.

By Anne Goode

As we go into our second year of war, here are predictions of Washington authorities and economic experts for 1943:

Living cost will rise 6 per cent. Food will be most responsible.

There'll be a stiff increase in your taxes. Larger personal exemptions may help ease the strain.

Clothing will tend to standardization. . . . Lighter shades will predominate (greens, yellows, oranges). There'll be a switch to grainer diets—macaroni, noodles, bread—as staple foods become scarcer.

On the rationed list. Most foods (bread and cereals excepted), wool, clothing, shoes; we will be conserving our footwear by giving 'em the ol' shoo with lime bottled or self-heating wax liquid.

Butter and other dairy products will face rationing; there will be a swing to margarine for table and kitchen use; housewives will find the modern product made of vegetable oils and skim milk, with Vitamin A added.

Recreation: Baby carriages, bed ding and mattresses, bicycles, cutlery, domestic cooking ranges, jewelry, kitchen utensils, sewing machines, musical instruments, razors, electric lamps and shades.

Hobbies: Some cosmetics, a giraffe (with as much rubber as you'd like), nylon hose, silk hose. Farmers will be asked not to grow such "non-essentials" as cantaloupe, cucumbers and cauliflower. There'll be others added to the list.

It's unwarranted optimism, the experts say, to think war will be over before next December. Military experts still talk of several years of fighting.

Chemical experts say improved dyes make this a safer war for American soldiers. Uniforms will retain their protective color despite tropical sunlight and rain.

As to coffee rationing, we're still the envy of Europeans. It's one day here—but the Belgians (if they're lucky) get 10 cups of chicory a month. Danes get about seven cups each 30 days; French working the "black market" might get a "real" cup every 10 days.

Cow talks switch off to war! Springy and moisture-resistant, they're ideal for padding material in Army mattresses. Formerly used in carpet sweepers. Now the armed services get all available.

Dehydrated foods, mainstay of the Army, Navy and lend-lease, are being tested on the home market. Dried skim milk (25 cents per pound package) and dehydrated bananae sold in N. Y. stores.

We women are the most promising source to meet needs for 3 to 5 million more workers for war industries. Latest West Coast news is that women have already taken their places alongside men as waterfront workers! Others are enroute.

Washington predicts a last fling for the buying public before war completely dominates civilian life. Now most commodities are available. Present stocks won't last long. War workers will splurge. Leading department stores report demand for solid silver, high priced furs and jewels.

It's an A plus for the women workers at the Piletrain Yards of the Pennsylvania Railroad from their foremen. They're willing, careful, steady and don't lay off as much as men! They work eight hours a day or night and make from 55 to 72 cents an hour. Wear slacks or overalls. Load freight cars, clean shops, help mechanics, etc.

Horse meat. Federal inspectors, may appear soon on many markets. Already is being sold in Boston. Much like beef in appearance. It should be similarly prepared. Steaks are about 35 to 50 cents per pound, roasting meat about 25 to 50 cents.

Hawaiian children of the embattled territory now leave class rooms for a day of emergency work. Many help in pineapple fields.

Better make no mistakes! WPD says no more erasers on pencils. . . . And be in the right! Buy more war bonds and stamps! Then buy some more!

WHAT IS INCOME TAX?

The federal income tax is, as the name implies a tax levied upon incomes, and it is payable in relation to the amount of income. Income, for Federal income tax purposes, means in general any compensation for one's services, whether the compensation be in money or in goods or other services; it includes also the net value received for the product of one's labor, as farm produce in the case of a farmer; income from investments; profit from business operations; and other gains from sales and exchanges of goods and property. Certain limited categories of income are, however, tax exempt, and to the extent of such exemption are excluded in computing the tax.

Because of exemptions from the tax given to persons having less than certain stated amounts of income, as well as because of various deductions and credits allowable, only a small proportion of the number of persons receiving income have until recently been subject to the tax. Thus, of the estimated 55 million persons in this country who received income in one form or another during the calendar year 1941, only some 26 million persons were required to file Federal income tax returns for that year, while of these same 26 million, more than nine million were not taxable due to credits and deductions allowable.

As a result of the lowering of exemptions, many more persons are now subject to the Federal income tax than before, and for the calendar year 1942 it is estimated that more than 35 million persons will file Federal income tax returns. To the large number of persons now subject to the Federal income tax, who have never reported income before for Federal tax purposes, an understanding of the law and applicable regulations is of prime importance.

An income tax return is a declaration on the part of the taxpayer of his total taxable income for the year, together with the various deductions, exemptions, and credits to which he is entitled. It is in reliance upon voluntary disclosure, and the integrity of taxpayers generally, that the cost of administration of the income tax can be kept at a minimum. Though the return is a voluntary statement, any person who willfully makes a return true and correct in every material which he does not believe to be true is subject to the penalties provided by law.

The first requirement of the law is the filing of an appropriate return. For individuals generally, this must be done by March 15 following the end of the calendar year. The return must be filed with the

appropriate Collector of Internal Revenue for the district in which is located the legal residence or principal place of business of the person making the return.

Under the present law every single person, and every married person not living with husband or wife, having a total income (earnings, together with other income) of \$500 or more, and married persons living with husband or wife throughout the taxable year, who have an aggregate income (total earnings of both husband and wife, together with other income) of \$1200 or more, regardless of the amount of net income, must file a return.

ABOUT OBJECTIVES

This fine picture is part of a series on a hunting trip. You'll find your camera will be of more value to you if you use it to work out picture stories, or in connection with your work or hobby.

A SOUND approach to photography demands not only that an individual become thoroughly competent with his camera, but that he also have a purpose behind his picture taking.

What that may be will depend upon what you are interested in, perhaps upon what you hope to accomplish, and probably upon what you are doing.

At this time I won't attempt to suggest even a smattering of the ways in which photography can be of service to you—there are just too many—but I'd like to have you think about the possibilities because having a definite objective will help you build a collection of really interesting pictures.

For instance, many people these days are making it their objective to keep the boys in service posted on developments at home, through snapshots. And you couldn't make better use of your pictures. The men in service always like to receive newsy snapshots which show

what the folks have been doing. They're interested in everything, from the walk you took in the country to the hour you spent giving old Rover a bath. So make it your objective to take pictures for the boys in camp. You'll find it's fun, and they'll appreciate it tremendously.

However, a word of caution. Take things easy at the outset. Don't try to picture everything at once. A set of four or five pictures which tell a definite story makes the best possible beginning, and such experience will give you confidence and the ability to tackle bigger things.

So, right now, give yourself an objective and start work. Make news pictures of home activities for the boys in camp, make a photographic record of your hobby, let photography help you in your business. Put your camera to work, and you'll find it will bring you ever greater dividends in satisfaction and enjoyment.

LOOKING AHEAD

By GEORGE S. BENSON
President, Harding College
Searcy, Arkansas

Shortly after President Roosevelt returned from his secret trip around the country observing conditions, all his words were complimentary to America's plain people, everywhere cheerfully depriving themselves to win the war. Willingly they waive the trivial luxury of a second cup of coffee; stoically they store the family car; prayerfully they part with their beardless boys. It is enough to make the chief executive of a great nation proud.

According to news dispatches, only one dark spot marred the picture, namely, Washington, D. C. "War

spirit and morale were good everywhere except in Washington," is how one of the daily papers in the capital summed up the president's remarks. That was early in October but my own recent trip to Washington convinces me that the contrast is just as marked now as it was then.

Harry Hopkins' Warning

Already we country people are beginning to feel unmistakably the pangs of wants such as Harry Hopkins (the President's closest friend) foretells in the American Magazine for December. In Washington however, there appears to be a large number of people who don't have to worry about wants; or maybe they have not yet admitted that this is their war.

In small towns, service to customers is disappearing. Now-a-days when you enter a store you wait, and you don't grumble because we are

at war and there is a labor shortage. Hopkins says 2.3 million more men now working in stores, restaurants, garages, etc., will yet go into war work, also about 1.1 million mechanics, leaving some 4,000 to answer civilian calls. "No man should be allowed more than five automobile tires," he writes, and "domestic servants will become a rare luxury."

It Has Happened

The ink is barely dry on Hopkins' article and the farmer with five good tires is a distinguished citizen. Household servants have always been luxuries in the country, but today, a farmer with a sick wife may be obliged himself to assume the roles of nurse, cook and charwoman. Meanwhile in our government there are literally hundreds of chauffeur-driven automobiles in use by men in non-war bureaus, but Mr. Hopkins' article did not suggest that these cars will be put into the war effort.

The chauffeurs who whisk Washington bureaucrats back and forth get their work assignments and their pay-checks from the government. Is it fair to ask if these sleek manservants will be going into war work, and if so, when? Many bureaus in Washington are speeding up the war effort not at all. That wizard of humor, Howard Brubaker, said recently that some people are afraid the WPA may soon be unemployed through no fault of its own. His remark was funny and I am grateful for the laugh, but it was a bitter one.

Senator Harry F. Byrd has estimated approximately three million men in Federal bureaus; two million more in state bureaus. Many of these are doing indispensable work. Some of the others can never be dislodged from their comfortable berths. But one thing is certain:

Uncle Sam does not need any more useless bureaus. Just the same, new boards are being formed endlessly and these are establishing branch offices and creating fat jobs for men whose work does not serve in the least to hasten victory.

And How They Grow

The law governing the renegotiation of war contracts will (by itself) create four boards, many branch offices and possibly 200,000 jobs for auditors, investigators, etc. Congressman Wesley E. Disney wrote an amendment to the bill that would have turned thumbs-down on a high-paid army for the "Renegotiations Front," eliminating, he said, 95 per cent of the work, but it was never adopted. However, there may be another chance to change the bill.

The conferees of the powerful Ways and Means Committee made this report to the House of Representatives when the Disney amendment was killed: "It is anticipated that the Ways and Means Committee will study Section 403 in connection with matters now pending before the committee, with an eye to a more general revision than is contained in the 1942 Revenue Bill."

To Save Man-Power

In 1941 I took part in an undertaking to direct the public's attention to millions of dollars being wasted even then, in non-defense activities. It was signally successful. The public got busy on the economy program and got results. Today it seems especially needful to focus public attention on the government's non-war use of man-power in bureaus.

I know the readers of this column alone, if they were sufficiently interested, could prevent the creation of unnecessary bureaus and could divert many men from government

jobs where they are not actually doing anything to hasten the winning of the war. Cutting down bureau overhead, pruning out unnecessary personnel, and even abolishing whole bureaus are matters within the province of congress.

THE LOW DOWN FROM HICKORY GROVE

Our whole mess and furore about youth delinquency looks like we are getting the old cart before the horse. We would come nearer making some headway if we did something about our delinquent mamas and papas versus their offshoot. We got too many hot mamas and prancing papas. They been stepping on the gas and turning the youngsters over to be brought up by some playground director or social theorist—some graduate in psychology from some noted university. We are now in our second generation of delinquents.

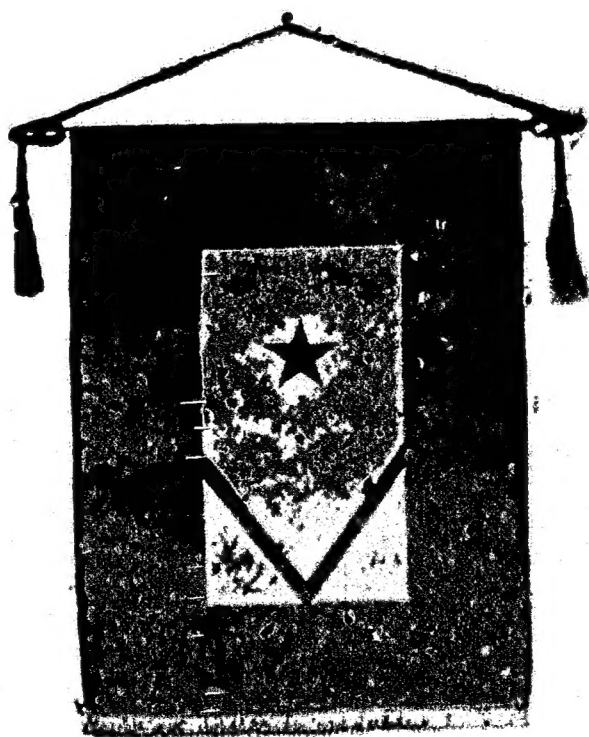

"What is your idea on fixing everything?" says Henry. "I am glad you asked," I says. "First, I would give the police free rein. When they pick up an obstreperous 16-year-old and lock him or her up, they would go right out and round up the gosling's mama and papa and waitz them into the same jail. The whole family could cool off together—and maybe get acquainted. And in the second place, I would have an open season, year around, on psychologists, and pay a nice bounty for every hide brought in."

Yours with the low down,

NO SUBSTITUTE FOR FREEDOM

An free American citizens we have found we can meet the test of war. We have the ability to get things done. We have courage and daring. Our men have shown in stark heroism that on the military front we are not soft. We can fight with the tricks our forefathers learned from the Indians, and we can fight with machines. Guadalcanal and North Africa have proven that in brief, we can win the war.

But there is more than the military front. There is the home front. And here, except for the production miracle of industry, there is evidence of softness, of confusion of ideals. Group bleeding has put the attainment of personal comfort and security ahead of the national welfare. In many quarters a desire to eliminate

human want at one fell swoop has become an obsession. An agency of government has even prepared a new bill of rights, the basic tenet of which is economic security. This new bill is proposed as a supplement to the old bill defining our liberties at the time the United States Constitution was adopted. It puts security on a par with freedom, on the theory that the American people will abandon freedom if they are not guaranteed three square meals a day. It implies that the American people suffer from the "great depression" and fearful of post-war uncertainty, do not propose to go hungry, that if they cannot have their freedom with full stomachs, they will do without freedom.

If such is true, we have drifted far from the ideals the Pilgrims carried ashore at Plymouth Rock. Even as our men on the battlefields

are now dying, the Pilgrims died and suffered hardship for just one reason: to preserve a spot on this globe where the individual could be free. And they got that freedom. They got it because they were tough. Their ideals came first, their stomachs second. Our men are winning battles now because they are tough. They are thinking of freedom.

A year ago there was a grave question in the minds of millions as to whether we could arm fast enough to stem the tide of aggression. There was an equally grave question of whether we could do so without destroying free enterprise and representative government. There were those who believed it would take total dictatorship to beat the dictators. The challenge fell on industry. The

machines had to be built by industry. Our natural resources and factories had to be mobilized for war on a scale that wrought shattering changes in technique and precedent. Industry knew that the cracker-box agitators were waiting to pounce upon the country with revolutionary schemes at the slightest sign of failure.

It is to the credit of thinning government officials that revolutionary changes in government and industry were not forced before free enterprise had a chance to show what it could do to prove that our democracy was not a failure. Our factories did a magnificent job. In a matter of months, they underwent retooling and conversion. Today tanks, planes, guns, ships, are rolling off the assembly lines by the scores of thousands. Our war production has caught and passed the dictator enemy who spent years producing for war under an elaborate "economic security" program which by its very completeness had destroyed individual freedom—the same years that our industries continued to produce for America's unregimented, peaceful millions. Back of the manufacturers stand American farm producers and distributors, together with the metal and coal mines, the oil, the power and transportation industries. They feed our war workers and keep the materials moving into the assembly lines.

The end of the war may be distant still, yet it is in sight. Again free enterprise faces a challenge. And again it faces it against a backdrop of threats. Those threats are cloaked in the prevalent idea that a full stomach is an unalienable right. Far-sighted leaders know that the challenge of the post-war world will be the toughest of all. It will be far tougher than the facts justify because of demagogic attempts to soften our people with illusory social dreams of total "economic security."

But industry is making its plans. These plans will have to be daring. Industry must go on the offensive. It must show that unprecedented production under a system of free enterprise is the only sure way to build a lasting peace under the banner of individual freedom. It must lay the groundwork for this production now. And it must have the wholehearted cooperation of all Americans on the home front. There is no room for the labor racketeer any more than for the exploiting capitalist or the faithless politician.

We on the home front must do a lot of clear thinking. We must now be hardened by a determina-

tion that above all else we must save the right of the individual to be free. We must realize now and in the peace to come, that individual freedom is more important than individual comfort. Bitter experience has demonstrated that without freedom there can be neither comfort nor security. We must reaffirm our belief in our Constitutional government.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nationwide reputation. Are recommended by grateful people the country over. Ask your neighbor!

Festive Shadow Layer Cake

Easy—Quick—Thrifty

If you're extra busy this holiday time with war activities added to your regular homemaking chores, you'll be delighted with this new Shadow Layer Cake recipe. It's easy to make, quick to bake, thrifty—and the result is as pleasing to see as it is delicious to eat.

And remember that chocolate is a food as well as a confection, so this marvelous looking cake is energy-giving and fatigue-resisting too—because it's made with Semi-Sweet Chocolate and other nutritious ingredients.

Shadow Layer Chocolate Cake
Chocolate Mixture:
1 1/2 oz. packages semi-sweet chocolate, melted
1/2 tsp. salt
1/2 cup boiling water
2 tbs. shortening

Melt chocolate over hot water. Add salt, water and shortening all at one time and stir just enough to blend thoroughly. Set aside to cool, then make the following batter:

3 cups sifted cake flour
4 1/2 tbs. baking powder
1/2 tsp. salt
1/2 cup shortening
1 cup milk

Mix and sift together flour, baking powder and salt.

Cream shortening, add sugar gradually, then honey. Add vanilla, whole eggs and yolks, one at a

time, beating well after each addition. Add flour mixture alternately with milk.

Grease and wax-paper line three 9" layer pans. Pour 2 1/4 cups of this white batter into one pan. Add cooled chocolate mixture to remaining batter. Stir until thoroughly blended and pour into remaining two pans.

Bake at 375° F. Time: 25-30 min. Yield: 3-9" layers.

Frost with Sugarless Shadow Frosting.

Sugarless Shadow Frosting
2 egg whites, unbeaten
1 cup light corn syrup
1/2 tsp. salt
1 1/2 tbs. vanilla
15 marshmallows, quartered

Combine egg whites, syrup, and salt in top part of double boiler and mix thoroughly. Place over rapidly boiling water and beat constantly with rotary egg beater (preferably electric) until mixture will hold a peak (5 to 7 minutes).

Remove from heat, add vanilla and marshmallows and continue beating until cool and thick enough to spread. Frost cake, putting white layer in the middle.

Then melt 1/2 oz. package Semi-Sweet Chocolate and add 2 tbs. shortening. Drip chocolate from a teaspoon around outer edge and let it run down sides.

Yield: Frosting for tops and sides of 3-9" layers.

BETHEL WOMEN PLAN HONOR ROLL OF THOSE IN SERVICE

Last Friday afternoon the group of ladies who packed the Christmas boxes for the boys in the service met at the home of Mrs. Ralph Young for the purpose of organizing a club to continue the work.

Mrs. Young served as chairman and the following officers were elected:

President—Mrs. Hugh Thurston
Vice-President—Mrs. Homer Smith

Treasurer—Mrs. Paul Thurston
Secretary—Miss Beatrice Brown

Executive Committee—Mrs. D. Grover Brooks, Mrs. Philip Chapman, Mrs. Tena Thurston, Mrs. Ralph Young and Mrs. George Thompson.

The name chosen for the organization is The Bethel Service Club. Mrs. Young reported that the amount donated for the boxes was \$86.50, of which \$41.58 remains.

Plans are under way to erect an honor roll, and anyone wishing to contribute to the fund may contact the secretary.

The following, who assisted in preparing the Christmas boxes, automatically became members of the club, and anyone else interested in joining is requested to notify the president or secretary. Members are: Mrs. Ralph Young, Miss Beatrice Brown, Mrs. Dellison Conroy, Mrs. Tena Thurston, Mrs. Hugh Thurston, Mrs. Philip Chapman, Mrs. Grover Brooks, Mrs. Earl Davis, Mrs. Homer Smith, Mrs. Paul Thurston, Mrs. George Thompson, Miss Ida Packard, Mrs. Clifford Merrill, Mrs. Mabel Beckler, Mrs. Lloyd Luxton, Mrs. Roy Moore, and Mrs. John Meserve.

THE OXFORD UNITED PARISH NEW YEAR GETS OFF

The year gets off to a good start, if we can judge by the Church Meetings we have attended. At least the reports of the officers for last year have sounded very good. We have not heard from the Center Lovell meeting, but at North Waterford and Waterford the churches seem to be financially sound. The North Waterford reports showed the bills paid, and also the missionary apportionment paid in full. The same is true of Waterford, and for War Relief and other causes the Waterford Church is credited with a large amount. The New Year's Church Dinner at North Waterford was most bountiful, but on account of the storm and conditions of the road the number present was rather small. The Monday evening buffet supper at the Waterford Parsonage was, to put it mildly, most ample; and the supper was followed by the meeting of the Congregational Parish, and the Congregational Church. The first meeting was called to order by George H. Rice, the Clerk, who was first elected in 1885. There is a term of office that would be hard to equal. Especially when added to it was the record of his sister, Mrs. Ella Millett, who was clerk of the Church for almost 50 years.

The Waterford Y. A.'s are meeting at the Parsonage on Wednesday evening of this week, and next week Wednesday, the Lovell Group will meet at the Village.

If the weather does not fall in, again there will be a Circle—the Christmas Circle at Albany on Thursday evening.

On Friday evening the Lovell Circle will serve supper, and this will be followed by an entertainment.

The North Waterford S. S. Teachers' Meeting will be held next week but we have not heard the definite night, as yet.
